

A1
Cont.

at least 1 weight percent of an activating compound, said activating compound being a monovalent salt; and wherein the wetting composition contains less than about 10 wt% of organic solvents.

13. (Amended) A wetting composition for use in conjunction with a non-polyvinyl alcohol-containing polymer having water solubility properties that are ionically triggerable, said wetting composition comprising:

- about 86 to about 98 weight percent deionized water;
 - about 1 to about 6 weight percent sodium chloride;
 - up to about 2 weight percent of one or more preservatives;
 - up to about 2 weight percent of one or more surfactants;
 - up to about 1 weight percent of one or more silicone emulsions;
 - up to about 1 weight percent of one or more emollients;
 - up to about 0.3 weight percent of one or more fragrances;
 - up to about 0.5 weight percent of one or more fragrance solubilizers;
- and
- up to about 0.5 weight percent of one or more pH adjusters.

12

19. (Amended) A method of making a wetting composition for use in conjunction with a non-polyvinyl alcohol-containing polymer having water solubility properties that are ionically triggerable, said method comprising:

mixing one or more monovalent salts with one or more additives selected from one or more from skin-care additives; odor control agents; detackifying agents;
